

Meredith Renda

UX Designer creating impactful experiences through meaningful design and empathetic research.

Experience

Altera Digital Health - UX Designer

March 2022 - Current

- Collaborates with designers, product owners, and developers to deliver features across mobile and desktop experiences.
- Independently delivered 14 separate capabilities.
- Delivered MVP of a new desktop application in 7 weeks alongside 5 other designers.
- Created alignment across product and design teams by developing a product requirements template to improve the Agile requirements handover process.
- Appointed to a styling team to work with development to aid in understanding our Design System and styling Angular components

Credit Suisse - UX Designer

August 2021 - March 2022

- Met and collaborated with key stakeholders to perform design thinking workshops and one-on-one user interviews.
- Designed user-centric wireframes and iterative prototypes to reflect upon the user's desires and needs on several platforms.
- Performed research to develop KPIs for the design thinking organization to better measure success and operationalize the strategy firm-wide.

Credit Suisse - Software Engineer

July 2020 - August 2021

- Part of a new graduate program called the Technical Analyst Program.
- Worked as a software engineer where I designed and developed a microservice to track metrics in a feed files workstream to prevent change relates issues.
- Served as leadership on the Technical Analyst Committee, which consisted of four leaders who were selected by peers, to make decisions and collaborated with senior management and HR.

UNC Wilmington - Data Science Research Assistant

January 2020 - May 2020

- Worked under the UNCW Data Science department. My focus was on the information vacuum that new migrants experience upon arrival in the US. Extracted and analyzed data using the Twitter API.
